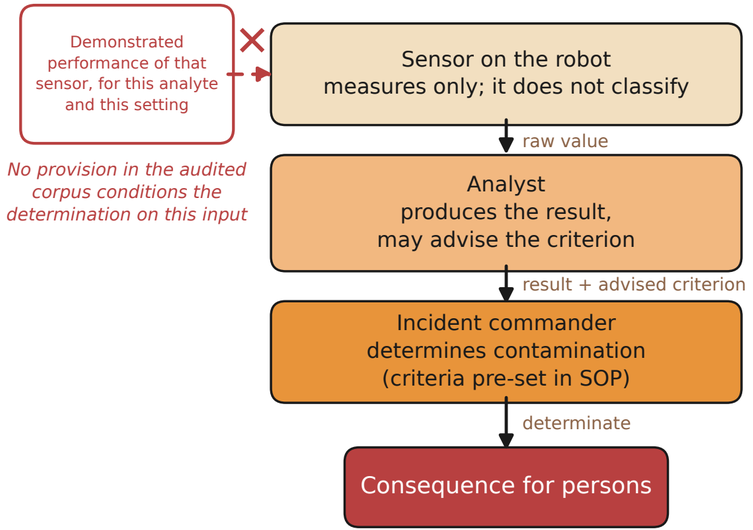
## (a)

Measurement, analysis and determination are separated by doctrine



*The commander's decision is determinate.*
*What it stands on is not bound by any rule we found.*

## (b)

Four outcomes the instrument can return

**Determinate binding**

An authorising provision is conditioned on an evaluation whose result decides the outcome

*KR Intelligent Robots Act Art. 40-2(3) "must obtain a change certification"*

**Zero point**

An authorising provision exists and considers performance, but nothing turns on the result

*AI Act Art. 5(3): prior judicial authorisation — conditioned on purpose, not on performance*

**Not an authorising provision**

The concept appears, but not in a provision that grants or withholds authorisation

—

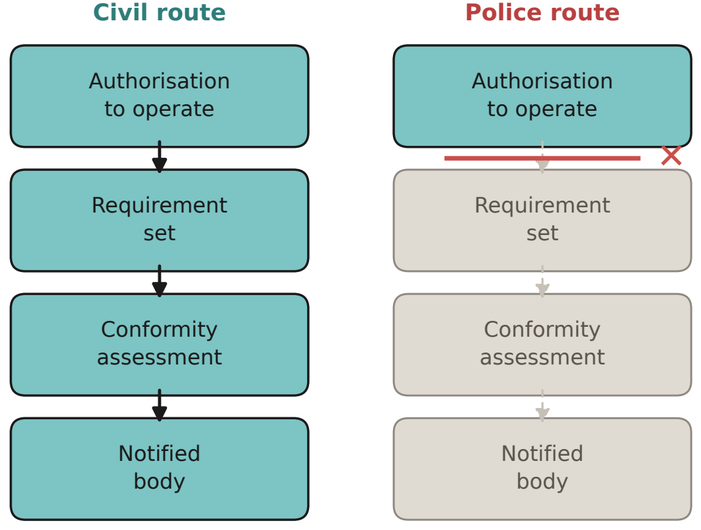
**Concept absent**

No provision in the corpus addresses the constraint at all

*Decontamination sequence; release criteria; SOP mapping*

## (c)

A carve-out is the deletion of nodes from the provision graph



*14 CFR Part 107 Subparts C–D*
*Reg (EU) 2019/945 + 947*

*AC 00-1.1B ¶12 self-certification*
*Reg (EU) 2018/1139 Art. 2(3)(a)*

*Same platform, same mission, same jurisdiction — only the elected legal route differs*
